WESTHAUSER'S NURSERY

Grower of Small Fruit Plants

SAWYER, MICHIGAN

REC'D  
JUN 13 1924  
U.S. Department of Agriculture

After years of experience and careful study, we believe our list of plants below are the varieties for you to plant for success. We have raised small fruit plants for many years, and guarantee every plant we ship, true to name; and truly believe there are no better plants raised regardless of price. We have many satisfied customers.

FOLLOWING ARE LETTERS FROM A NUMBER OF SATISFIED CUSTOMERS

Westhauser's Nursery, Sawyer, Mich.  
Dear Sir:—You no doubt will be glad to know that the 7,000 Gibson strawberry plants, and the 1,000 raspberries, arrived in excellent shape. We were able to plant them within a few days after arrival, and, I am sure you would be pleased to look over our fields now and see the splendid stand.. I feel sure that not more than 100 of the strawberry plants failed to grow, so you see we are well pleased. I would like you to send me your price list next spring.  
Very truly yours, W. S. W.

West Allis, Wis., June 9, 1923.

Westhauser's Nursery, Sawyer, Mich.  
Dear Sir:—My plants arrived in fine condition, and are in fine shape now.  
Very respectfully, E. H. H.

Cressy, Mich., June 17, 1923.

Westhauser's Nursery, Sawyer, Mich.  
Dear Sir:—Your plants were fine and very thrifty.

Pillston, Mich., May 25, 1923.

Yours, J. B. C.

Westhauser's Nursery, Sawyer, Mich.  
Dear Sir:—Our plants reached us O. K., and we were well pleased with them.  
Respectfully, R. G. R.

Sparta, Ill., June 12, 1923.

Westhauser's Nursery, Sawyer, Mich.  
Dear Sir:—I received your second shipment of plants O. K. They were all very nice, with a good Root System. I was well pleased with the price.  
Yours very truly, J. I. B.

Flinton, Pa.

Guarantee. Labeling and packing is done with greatest care, and we guarantee our plants 100 percent true to name or money back.

## DESCRIPTION OF STRAWBERRIES

**SENATOR DUNLAP.** Medium early. The best general purpose variety. There are more Dunlaps sold than all other strawberry plants together; adapted to all localities. The fruit is dark red with glossy finish, shading to a deep scarlet on the under side. The meat is a bright red all through and exceedingly juicy. It succeeds everywhere and with everybody—the new beginner as well as with the veteran grower—but should not be allowed to mat too thickly. For a medium-sized productive early to midseason berry you need not hesitate to plant Dunlap.

**CHARLES I.** Earliest berry to ripen. Good plant-maker; fruit large and firm. The big money in strawberry growing is usually made at the start of the season before the market is overstocked. Charles I ripens nearly a week before any other strawberry and is very productive, yielding more quarts of large, fine looking berries than any other early variety. A strong fertilizer and a good grower. Berries large, regular in form, and of good color and quality. This valuable early strawberry continues to produce large, fine looking berries till the last picking.

**GIBSON.** Medium late. The Michigan market berry. Has no superior. Dark red, firm, retains size and quality to the last berry. Berries are large and regular in shape, holding their size well to the end of the season. Flavor is neither sweet nor sour, but just right for canning. Extremely productive, in fact we know of no variety that will produce more quarts of berries per acre than the Gibson. A strong vigorous plant that withstands adverse conditions admirably. We recommend it and know you will not make any mistake in planting Gibson.

**AROMA.** Late. Large berry, good shipper, always bringing good price; extra fine plants. One of the most popular late varieties. Holds its size well throughout all the pickings. Berry is roundish—conical, smooth and perfect in form and of a beautiful bright glossy red in color; very firm and of high quality. Its rich aromatic flavor has suggested its name. The habit of spreading which this variety possesses opens the way for the sunlight to reach the crowns. The leaves are broad, clean and smooth and of dark green color.

**JOE CRAMPTON.** As late as Uncle Jim, heavier bearer; perfect in size and color. Brings premium in any market.

**PREMIER.** Early. One of the best early berries on the market. Large in size, firm, and of beautiful color, holds its size until the last picking. Heavy producer.

**GLEN MARY.** Medium late. A very healthy and vigorous plant maker. Heavy producer. Stands northern climate well. Glen Mary is grown in this section for the last 20 years. Well suited for long distance market.

**WARFIELD.** Medium late. Another old time variety. A berry the housewife delights for preserving. Unexcelled for table use. Large deep colored berry. Fine flavor.

## Everbearing Strawberries

**PROGRESSIVE.** Medium size berry. Very productive and sure crop.

**CHAMPION.** Good plant maker. Produces abundant fruit on both old and new plants first season. Has made its reputation and made good its name in every respect.

## BLACK RASPBERRIES

**CUMBERLAND.** The largest and best Black Cap on the market. Hardy and very productive. Our fruit grower plants this variety to a large extent, as it has proven unexcelled.

**PLUM FARMER.** An early ripening variety. Very thrifty and stocky. Brings a good price, being the first on the market.

## RED RASPBERRIES

**EARLY KING** produces a large crimson firm berry. Holds color and ships well. The attractiveness of the berry assures a fancy price in any market.

**CUTHBERT.** Introduced 40 years ago and still going strong. One of the largest raspberries.

## GRAPES

The grape is the most healthful of all fruits and most highly esteemed for its many uses. It can be grown by anyone who has a garden or yard, and little time to give to it. The vines can be trained up the side of a building or garden fence or over an arbor, but the more profitable way is to grow them on a wire trellis.

**CONCORD (Black).** This is the grape so largely planted all over the country for commercial purposes. Concord is the main variety for profit and is sold in large quantities. A large, purplish black grape, ripening about the middle of September; vines remarkably vigorous and free from disease; the standard for productiveness and hardiness all over the country. Concord is by far the best and most profitable market grape grown. Strong well-rooted vines.

## CURRANTS

Currants ripen just before raspberries are gone, and continue in prime order for several weeks. There is no more useful fruit than the currant, and it is among the easiest to cultivate.

**CHAMPION.** Very large, black, flavor of fruit particularly delicious; productive and a strong grower. Fruit hangs well on bushes and will stand severe pruning.

**LONDON MARKET.** The home of this valuable currant is Michigan, where hundreds of acres of currants are grown for the market.

---

## READ THIS BEFORE MAKING OUT YOUR ORDER

**Location.** Berrien County, Michigan. Especially noted for raising hardy plants; seventy miles from Chicago; quick shipping connections everywhere.

**Terms.** Cash with order. Will book orders one-third when order is placed, balance before stock is shipped.

**Shipping.** Express is the quickest and safest way to ship, because the express company is responsible for safe deliveries. If you wish parcel post shipment the postage must accompany order.

**Substitution.** Be sure and give second choice. We will substitute a variety as near your first choice as possible, should we be out of variety ordered, if desired, in latter part of season.

**WE SEND A COPY OF CERTIFICATE OF NURSERY INSPECTION WITH EACH ORDER.**

**Shipping Season.** Latter part of March to about May 15th.
